SAAD SHAKEEL

Lahore, Pakistan | ultrasaad04@gmail.com | +92 3247899667 | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience delivering web applications and AI-assisted features in collaborative development teams. Skilled at translating requirements into reliable, user-focused solutions, improving existing functionality and resolving technical issues. Brings a practical approach to problem-solving, attention to detail and a commitment to continuous learning.

TECHNICAL SKILLS

Languages: C++, C#, Python, JavaScript, TypeScript
Frontend: React.js, Next.js, React Native, Redux, Zustand, TanStack Table, Tailwind CSS, HTML5, CSS
Backend: Node.js, Express.js, Fastify, ASP.NET, GraphQL (Apollo Client), REST APIs
Databases & Auth: MongoDB, SQL, MySQL, PostgreSQL, Redis, Supabase, Firebase, Firestore, OAuth, JWT
AI / Machine Learning: PyTorch, OpenCV, Image Processing and AI-assisted product
Tools & Workflow: Git, GitHub, GitHub Actions, FFmpeg, Docker, CI/CD, Jira, Vercel, Vite

PROFESSIONAL EXPERIENCE

Software Engineer **Nov 2025 – Present**
Softations | Gujrat, Pakistan

- Rebuilt the Source Inputs module using React, TanStack Table, and GraphQL, delivering tabbed views for raw materials, primary lots, logistics units, and batch lots with client-side search, sorting, and pagination.
- Developed a GS1 Linktype Manager for grouped resource connections, implementing CRUD mutations, public/private visibility controls, source and format aggregation and resolver URL previews.
- Standardized raw-material weight handling across product editing, manufacturing, list, transaction, and PDF views, correctly distinguishing unrecorded weights from valid zero weight states.
- Extended a brand creation wizard with required-field validation, logo and color selection, Shopify/WooCommerce platform integration and persisted form recovery after page refresh.
- Built OAuth-based Google and Outlook calendar and inbox integrations with real-time Firestore synchronization, plus AI-assisted task management using voice and function-call workflows.

Frontend Developer Intern **Aug 2025 – Oct 2025**
DevSum | Islamabad, Pakistan (Remote)

- Developed dynamic UI components using React, Tailwind CSS, and modern frontend libraries.
- Built responsive, reusable components and worked on API integration, state management and performance optimization.
- Collaborated with multiple developers in a growth-focused environment, consistently delivering project modules on schedule.

Web Developer Intern **Jul 2025 – Aug 2025**
Siber Koza | Kharian, Pakistan

- Developed and maintained responsive web applications for cross device compatibility, improving performance and SEO rankings.
- Collaborated with the team to enhance user experience and deliver quality, production ready solutions.

Web Development Intern **Sep 2024 – Dec 2024**
Realz Solution | Islamabad, Pakistan (Remote)

- Built fullstack web applications using React.js and Node.js and integrated the Twilio API for SMS and voice call features.
- Developed responsive, high-performance interfaces with a focus on usability and user experience.

Full Stack Developer Intern **Jul 2024 – Aug 2024**
Urbanloop Tech | Islamabad, Pakistan

- Worked on an AI-powered search system using Fastify, Node.js, and PostgreSQL to process queries and generate text and visual responses.
- Designed dynamic user interfaces using EJS and contributed to CRUD operations and API integration across the fullstack application.

PROJECTS

Orijin Plus | *React, TypeScript, Apollo Client, GraphQL, Firebase*

- Administration platform for managing brands, products, SKUs, raw materials, manufacturing, and logistics, with GS1-aligned product data workflows, Digital Product Passport disclosures, GS1 resource connections, and an integrated AI assistant.

Flow | *React, Vite, Zustand, Firestore, OAuth*

- Productivity platform unifying task management, calendar planning, and email triage, with Google/Outlook OAuth sync, real-time Firestore state and AI-driven task interactions via the Vapi voice platform.

SketchWise – Your Personal Art Tutor | *React Native, Python, PyTorch, Express.js, Redis*

- Built a React Native app that turns any photo into a sketch, generating step-by-step drawing video tutorials.
- Integrated a PyTorch Neural Style Transfer model to autonomously convert user-uploaded photos into sketches.
- Built an asynchronous pipeline between Express.js and Python worker services using Redis Streams for background image processing, plus a token-based credit system to manage compute limits.
- Automated tutorial video generation with FFmpeg, delivered via Cloudinary.

EDUCATION

BS Computer Science **Nov 2022 – Jun 2026**
University of Gujrat | 3.4 CGPA | Gujrat, Pakistan
